

THE TRUCK STOPS **HERE**

HOW TO TURN ALL YOUR ORGANIC WASTE INTO WATER IN 24 HOURS.

Send 100% of your organic waste down the drain in 24 hours. No trucks to haul it off, no fees for disposing of waste, no smelly dumpsters or compost stations... the Enviropure system eliminates waste and wastefulness while averaging about \$100 per month in utility costs. With equipment in various sizes, you can dispose up to 120 to 6,000 lbs of waste per day. 

The organic waste is mixed with a nutrient that turns the waste into a gray water that can be sent down the drain and back through the sewer system. The Enviropure system uses far less energy and space than composting and has very little odor compared to any other disposal method. **Call us to find out more. Visit championindustries.com.**
