

DISHROOM SOLUTIONS

PREFERRED SYSTEMS

Bi-Line Systems offer automated, efficient solutions for transporting dirty dishes, reducing manual labor, and enhancing workflow to keep up with high-volume meal services. These systems can be customized to fit specific layouts and requirements, leading to long-term cost savings and operational reliability. They reduce labor costs by minimizing manual handling, are low-maintenance, energy-efficient, and built to withstand high-traffic environments, thus ensuring smooth, efficient, and cost-effective handling of dirty wares.

Built and tested in the same facility as our dish machines – fully customizable for your needs.

ACCUMULATORS

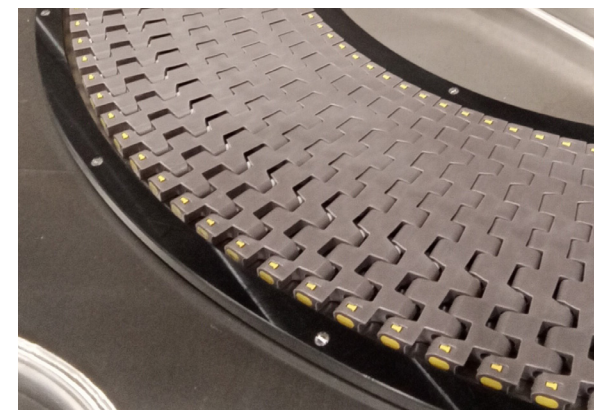

Maximize space and handling with Vertical & Multi-Level Designs.

* Tray or trayless configurations available.

WINDOW DROPS

Effortlessly manage tray returns and dish flow. Customer facing hides dishroom for patrons.

MAPTOP BELT

Designed for tray or trayless applications. Suitable for streamlining automatic ware transfer in high-volume facilities.

PULPERS

Reduce haul-away costs; 10 trash bags down to one. Close-coupled or remote up to 150 feet.

TRAY MAKE UP

Streamline meal preparation with Raceway or Circular designs.

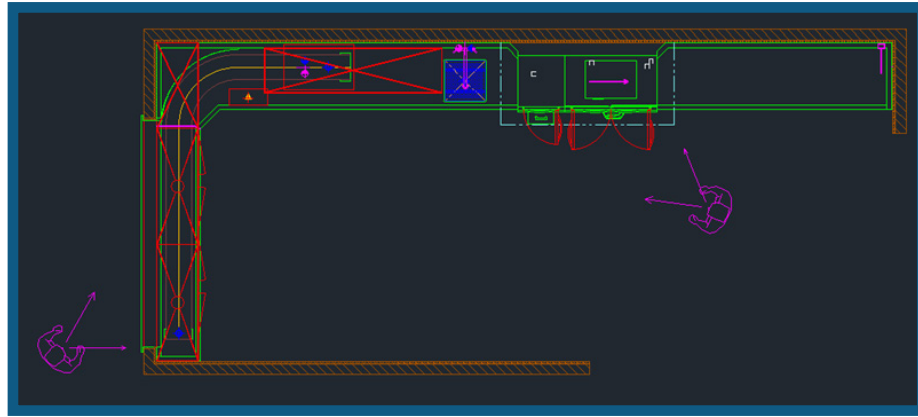

VORTEX POWERED SINKS

The agitating sink is designed to handle heavy-duty cleaning, replacing a 3-compartment sink.

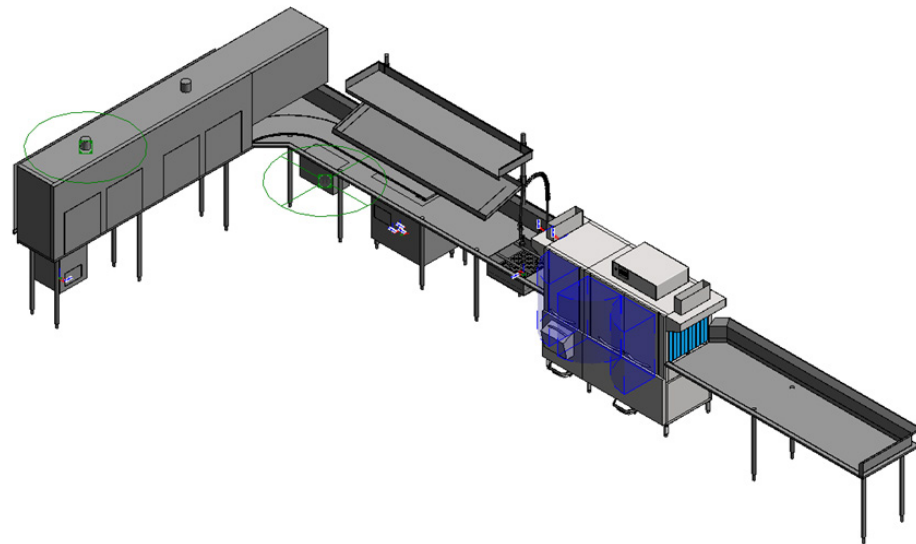

ONE STOP SOLUTIONS

FOR ALL WAREWASHING OPERATIONS

OUR SOLUTIONS

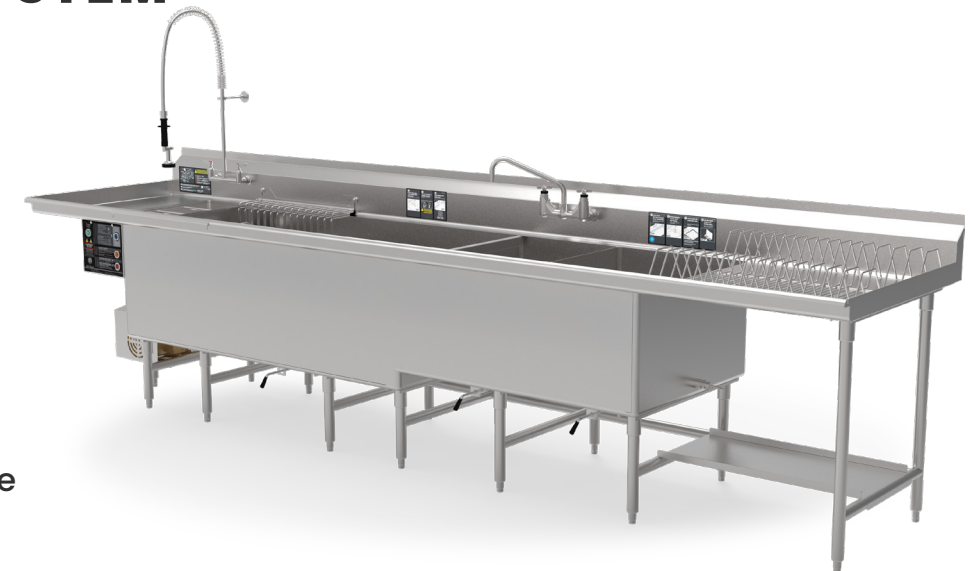

SONIC PRO PULPERS

The Sonic PRO series food waste reduction system by Bi-Line Conveyor Systems can reduce organic waste volume by as much as 85 percent and can process all organics including: produce, fruits, cut flowers, meat, fat trimmings, paper napkins, coffee grounds, spoiled milk, deli products and some soft plastics. The Sonic PRO series can be designed in either a closed-coupled or remote design. The system is fully customizable, designed to meet the unique needs of any facility from restaurants to hospitals, schools and other institutions.

VORTEX WASH SYSTEM

Built for high-volume operations, the Vortex Wash System delivers powerful, computer modeled wash action designed to maximize efficiency and reduce labor. Featuring heavy-duty stainless steel construction, customizable tank configurations, and intuitive controls, Vortex is engineered for reliability, ease of operation, and fast end of shift cleanup.
