#### LIMITED WARRANTY

Champion Industries Inc. (herein referred to as Champion), 3765 Champion Blvd., Winston-Salem, North Carolina 27105, and P.O. Box 301, 2674 N. Service Road, Jordan Station, Canada, LOR 1S0, warrants machines, and parts, as set out below.

**Warranty of Machines:** Champion warrants all new machines of its manufacture bearing the name "Champion" and installed within the United States and Canada to be free from defects in material and workman ship for a period of one (1) year after the date of installation or fifteen (15) months after the date of shipment by Champion, whichever occurs first. [See below for special provisions relating to glasswashers.] The warranty registration card must be returned to Champion within ten (10) days after installation. If warranty card is not returned to Champion, the warranty will expire after one year from the date of shipment.

Champion will not assume any responsibility for extra costs for installation in any area where there are jurisdictional problems with local trades or unions.

If a defect in workmanship or material is found to exist within the warranty period, Champion, at its election, will either repair or replace the defective machine or accept return of the machine for full credit; provided; however, as to glasswashers, Champion's obligation with respect to labor associated with any repairs shall end (a) 120 days after shipment, or (b) 90 days after installation, whichever occurs first. In the event that Champion elects to repair, the labor and work to be performed in connection with the warranty shall be done during regular working hours by a Champion authorized service technician. Defective parts become the property of Champion. Use of replacement parts not authorized by Champion will relieve Champion of all further liability in connection with its warranty. In no event will Champion's warranty obligation exceed Champion's charge for the machine. The following are not covered by Champion's warranty:

- a. Lighting of gas pilots or burners.
- b. Cleaning of gas lines.
- c. Replacement of fuses or resetting of overload breakers.
- d. Adjustment of thermostats.
- e. Adjustment of clutches.
- f. Opening or closing of utility supply valves or switching of electrical supply current.
- g. Cleaning of valves, strainers, screens, nozzles, or spray pipes.
- h. Performance of regular maintenance and cleaning as outlined in operator's guide.
- Damages resulting from water conditions, accidents, alterations, improper use, abuse, tampering, improper installation, or failure to follow maintenance and operation procedures.
- j. Wear on Pulper cutter blocks, pulse vanes, and auger brush.

*Examples of the defects not covered by warranty include, but are not limited to:* (1) Damage to the exterior or interior finish as a result of the above, (2) Use with utility service other than that designated on the rating plate, (3) Improper connection to utility service, (4) Inadequate or excessive water pressure, (5) Corrosion from chemicals dispensed in excess of recommended concentrations, (6) Failure of electrical components due to connection of chemical dispensing equipment installed by others, (7) Leaks or damage resulting from such leaks caused by the installer, including those at machine table connections or by connection of chemical dispensing equipment installed by others, (8) Failure to comply with local building codes, (9) Damage caused by labor dispute.

**Warranty of Parts:** Champion warrants all new machine parts produced or authorized by Champion to be free from defects in material and workmanship for a period of 90 days from date of invoice. If any defect in material and workmanship is found to exist within the warranty period Champion will replace the defective part without charge.

DISCLAIMER OF WARRANTIES AND LIMITATIONS OF LIABILITY. CHAMPION'S WARRANTY IS ONLY TO THE EX-TENT REFLECTED ABOVE. CHAMPION MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED, TO ANY WARRANTY OF MERCHANTABILITY, OR FITNESS OF PURPOSE. CHAMPION SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. THE REMEDIES SET OUT ABOVE ARE THE EXCLUSIVE REMEDIES FOR ANY DEFECTS FOUND TO EXIST IN CHAMPION DISHWASHING MACHINES AND CHAMPION PARTS, AND ALL OTHER REMEDIES ARE EXCLUDED, INCLUDING ANY LIABILITY FOR INCIDENTALS OR CONSEQUENTIAL DAMAGES.

Champion does not authorize any other person, including persons who deal in Champion Dishwashing machines to change this warranty or create any other obligation in connection with Champion Dishwashing Machines.

#### Model: HRU Heat Recovery Unit

The HRU heats cold water supplied to the dishwasher's built-in heat exchanger which raises the incoming temperature to approximately 110°F/43°C. The preheated water is plumbed to the final rinse water booster which ensures a minimum final rinse water temperature of 180°F/82°C to sanitize the clean wares. The HRU significantly reduces the energy required to heat water for the final rinse operations.

The installation, and initial start-up of your dishwasher must be performed by qualified electricians, plumbers, and authorized service technicians trained in commercial dishwashers.

Defects and repairs caused by unauthorized installers will not be covered by the dishwasher warranty.

Receiving

#### NOTE:

The installation of your Heat Recovery Unit **(HRU)** must be performed by qualified service personnel. Problems due to improper installation are not covered by the Warranty.

The HRU may have be installed at the factory. Proceed to the operation section of this manual if your HRU is already attached to the machine.

- 1. Inspect the HRU for damage due to shipping.
- 2. Check for any accessories that may have shipped with your dishwasher.
- 3. Move the HRU near its permanent location.

#### **CAUTION:**

Be careful when lifting and moving the HRU to prevent damage to the machine.

#### NOTE:

The installation of the HRU must comply with local safety and health codes.

- 4. Compare the installation site utility connections with the dishwasher utility connections and make sure that they are the same.
- 5. For new dishwasher installations, install the Dishwasher according to the instructions in the dishwasher service manual *Installation, Operation, and Service Replacement Parts*, which is shipped inside the dishwasher.

WARNING: <u>Moving Parts</u> may cause INJURY OR DEATH. <u>USE EXTREME CAUTION WHEN THE CONVEYOR</u> <u>IS MOVING.</u>

#### WARNING:

<u>Electrocution or serious injury</u> may result when working on an energized circuit. Disconnect power at the main breaker or service disconnect switch before working on the circuit. Lock-out and tag the breaker to indicate that work is being

Receiving

#### CAUTION:

Metal edges in the HRU may be sharp. Use appropriate caution when working on and in the vicinity of metal components

#### NOTE:

The installation of the HRU must comply with local safety and health codes.

- 1. The HRU weighs approximately 175 lbs./79.4 Kg and mounts on the top of the unload end of the dishwasher.
- 2. The unload exhaust vent of the dishwasher connects to the inlet of the HRU vent and is sealed with gasket material which has already been installed on the dishwasher.
- 3. The HRU is attached to the dishwasher by inserting fasteners from inside the dishwasher into weldnuts mounted in the HRU. Mounting hardware is included in the installation kit.

Heat Recovery Unit (HRU) shown installed on a right-to-left dishwasher without a Blower Dryer Option

Installation Mounting

#### NOTE:

The HRU may have been mounted at the factory so the procedures described below may not be required.

- 1. Install the HRU after the dishwasher is completely assembled.
- 2. Lift the unit with a forklift or a minimum of four persons capable of positioning and lowering the HRU into its final position.
- 3. Make sure the HRU vent inlet (A) is centered on the dishwasher.
- 4. Install the mounting hardware installed in the installation kit from the inside of the dishwasher hood to secure the HRU to the machine
- The mounting hardware (B) includes: (7) Hex hd. bolts 1/4-20 x 5/8",
   (7) 1/4" split lock washers, and (7) 1/4" flat washers.

(HRU shown in gray)

6. Electrical power is prewired from the heat recovery control box to the dishwasher main control cabinet to operate the HRU.

This Page Intentionally Left Blank

**Plumbing Connections** 

Refer to the photograph below and follow the instructions to connect the water lines to the HRU.

- 1. Connect compression fittings from the cold water supply line located at the base of the dishwasher booster heater to the HRU.
- 2. Connect compression fittings from the HRU return line at the rear of the HRU to the booster inlet located at the base of the machine.
- 3. Connect the red drain hose from the base of the HRU to the fitting on the rear drain line of the dishwasher. The fitting is located directly below the HRU drain line.

Heat Recovery Unit (HRU) water and drain lines are connected at the rear of the dishwasher.

#### Installation

Setting the Booster Pressure Reducing Valves (PRV's)

Refer to the illustrations on the next two pages for the location of the water valves and the Green indicator lights.

- 1. Ensure that all utility connections are complete.
- 2. Remove the lower front panel of the unload section.
- 3. Remove the coil assembly (A) from the multi-rinse valve.

#### CAUTION:

to prevent damage to the valve coil, energize the multi-rinse valve for as short a period as needed to make necessary PRV adjustments.

Immediately reinstall the coil assembly when PRV adjustments have been completed.

- 4. Turn on main water supplies to the dishwasher. Make sure steam supply is OFF.
- 5. Close all of the drain valves.
- 6. Remove the main control cabinet cover and set the Auto/Manual switch to the Manual position.
- 7. Turn ON main breaker power to dishwasher.
- 8. Turn OFF main breaker power to the booster and optional blower dryer (if equipped).
- 9. Turn dishwasher main power switch ON.
- 10. Allow dishwasher tanks to completely fill with water.
- 11. When dishwasher tanks are full, turn dishwasher main power switch OFF.
- 12. Turn the Auxiliary wash tank drain handle open and drain the tank (leave the drain open). (*This places the dishwasher in a FILL mode because the tank is empty.*)
- 13. Turn the dishwasher main power switch ON.
- 14. The Green FILL light in the control cabinet will be ON when the machine is filling.
- 15. While the machine is filling, adjust the HOT PRV #1 until the final rinse pressure gauge indicates 20 PSI. Tighten the PRV adjustment lock-nut to hold the setting.
- 16. Close the drain and allow the dishwasher to fill with water.
- 17. Turn the dishwasher main power switch OFF.
- 18. Make sure the main breaker or steam supply <u>to the booster</u> is OFF. Turn the hot water off.
- 19. Turn the dishwasher control panel Power Switch on.
- 20. Press the ENERGY SAVER mode selector switch on the main control cabinet. The green LED will illuminate and the conveyor will run.
- 21. While the machine is running, adjust the COLD PRV #2 until the final rinse pressure gauge indicates 20 PSI. Tighten the PRV adjustment lock-nut to hold the setting.
- 22. Now set the cold water <u>PRV #2</u> by adjusting the PRV until the final rinse pressure gauge indicates 20 PSI flow pressure. Note that the pressure gauge will cycle on for 15 seconds and then off for 30; therefore, the pressure gauge will read a flowing pressure for 15 secs., then read the no pressure for 30 seconds.
- 23. The Green FINAL light will be ON when the Cold water valve is ON. The Green REHEAT light will be ON when the Hot water valve is ON.
- 24. To complete the settings: Turn the dishwasher main power switch OFF.
- 25. Turn the main breaker or steam supply to the booster on.
- 26. Turn the Automatic/Manual switch inside the control cabinet to the Automatic position.

Setting the Booster Pressure Regulating Valves (PRV's)

- 1. Reinstall the main control cabinet cover.
- 2. Reinstall the coil assembly on the multi-rinse valve (A).
- 3. Open all drain valves and drain the dishwasher.
- 4. Turn the hot water supply ON.
- 5. Makes sure the main power supply is ON.

Electric HRU Booster PRV Locations (Right-to-left dishwasher installation).

Steam HRU Booster PRV Locations (Right-to-left dishwasher installation).

#### **Operation Indicator Lights**

Green indicator lights inside the HRU control cabinet indicate the operation state of the valves during the set-up procedures. Refer to the set-up procedures on the previous two pages to set the pressure reducing valves.

In addition, the green lights will indicate the operation of the booster valves during normal operation. Refer to the simplified logic diagram below which shows the interaction of the timers, thermistor reader (temperature control module) and the booster solenoid valves.

#### Exhaust Blowers

The HRU Exhaust Blowers operate when the dishwasher is running.

Exhaust Blower 1: runs whenever the dishwasher pumps and the final rinse are running.

Exhaust Blower 2: runs when only the final rinse is running.

Exhaust Blowers as viewed from the front of the dishwasher. (Left-to-Right Dishwasher Operation Shown)

Indicator lights inside the control cabinet indicate the operation of the valves.

NOTE: A detailed Logic Diagram is included at the end of this manual

Simplified HRU Cold and Hot Water Switching Logic Diagram

#### Operation

#### NOTE:

The operation of the HRU is automatically controlled by the dishwasher control circuit. The HRU has a control that is accessed only by a trained service technician.

Refer to the illustration below to prepare the HRU for operation.

- Open the top cover of the HRU and remove any foreign objects. (Refer to the cleaning section on the next page for detailed cleaning instructions.
- 2. Make sure the access cover is in place and secured by its retaining studs.
- 3. Make sure the vent adjustment handle is secure and set to its normal operating position.

#### Automatic Operation:

- 1. The HRU operates whenever the dishwasher pumps run.
- 2. Hot air from the dishwasher interior is recycled through the HRU and exhausted from the HRU vent which has been permanently connected to the building vent system.
- 3. A small amount of exhaust air may exit the unload end of the dishwasher. This is a normal condition.
- 4. The HRU is off whenever the dishwasher pumps are not running.

### Cleaning

## **CAUTION:** Do not place objects on top of the condenser coil nor with the cleaning devices. Avoid the use of cleansers or other detergents to prevent damage to the top of the coil

Refer to the illustration below.

#### Monthly Cleaning Schedule:

- 1. Open the top cover over of the HRU.
- 2. Remove the front cover of the unit by sliding it up.
- 3. Remove the front access cover which is retained by three knurled thumbscrews.
- 4. Flush the top of the condenser coil with fresh water.
- 5. Do not wipe nor brush the coil fins.
- 6. Flush the underside below the condenser coil with fresh water.
- 7. Leave the HRU covers off overnight to allow the inside of the unit to air dry.
- 8. Reassemble in reverse order at the beginning of the day.
