**Warning:** Plumbing and electrical connections should be made by qualified personnel who will observe all the applicable plumbing, sanitary, safety codes and the National Electrical Code.

**Note:** Water Hammer Arrestor (meeting ASSE-1010 standard or equivalent) to be supplied (by others) in common water supply line at service connection.

**Plumbing Notes:** Because of the variation in house-supplied steam and water pressures, steam and water pressure regulating valves (PRVs) may be needed. (Water PRV is standard on machines with booster). The PRVs can either be purchased from Champion or obtained locally.

**Venting Notes:** Fabricated duct size: 3-7/8” x 15-7/8” (Outside dimensions)

**Optional Drain Temper:** 1/2” NPT cold water connection required. 1/2” NPT drain connection from back flow preventer to house drain. (FIELD INSTALLED and PLUMBED).

**Two Tank PRO Rack Machine and Booster Ratings**

The tables below give the ratings for each model. The ratings include the requirements of the 12 and 21 kW booster heaters when they are use.
